

Best outdoor fiber

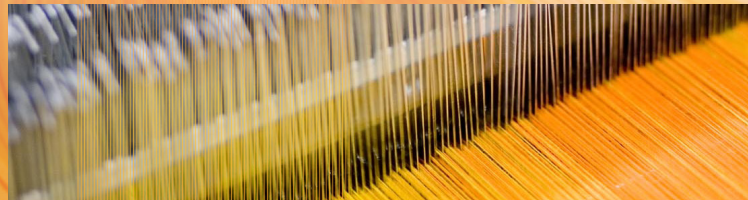

Quality in every fiber.

ACRYLIC

Spun-dyed acrylic
guarantees optimum
weather and light
fastness

Our premium awning fabrics are made from 100% spun-dyed branded acrylic and guarantee top-level functionality.

- Intense colour brilliance
- No fading - colours remain bright and luminous for many years
- High UV fastness, and thus no solidity loss
- Best weather-proof outdoor fibre
- Outstanding dirt and water repellency
- Pleasant textile feeling
- Breathable, no moisture build-up
- Easy installation and cloth change
- No unpleasant flapping noises

Skin protection guarantee

Reduce the UV load for your skin by upto 99%.

UV PROTECTION

In recent years, UV radiation has considerably increased. What many of us ignore: we are also exposed to UV radiation in the shade. Choosing a Sattler awning fabric means opting for safe UV protection. For example the skin of a person rated UV type I (red or blond hair, blue eyes and a very fair complexion) has an intrinsic protection time of approximately five to ten minutes. This person risks a dangerous sunburn in the case of unprotected exposure to full solar radiation. Already with a UV index of 40 around 97.5% of the radiation is reflected and absorbed.

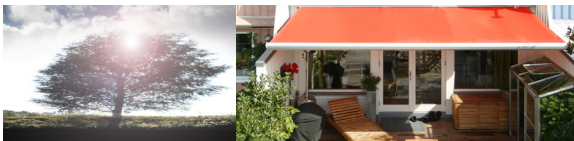

UV protection by comparison	UV Index
Light cotton clothing (acc. to UV Standard 801)	approx.. 2-10
Densely woven cotton clothing (acc. to UV standard 801)	approx. 20
Sunblocker correctly applied (LSF)	0-30
Shade under a tree	approx. 5-15
Shade under a sunshade (without special UV protection)	approx. 2-15
Sattler sun protection fabrics	40 - 80

SATTLER 
thinking highTEX

Not by chance your perfect shade.
Shade for my region.

REGIONAL DESIGN

Sattler's awning patterns are snap-shots of the world around us!
The worlds of color which we perceive in our environment are influenced by:

Light, climate, landscape and culture

The specific colour climate of a region has a substantial effect on our well being. Despite an increasing globalisation process, we find different worlds of color in different regions. We differentiate between uninhabited regions (natural color worlds) and inhabited regions (artificial color worlds). They distinguish a region.

In co-operation with Dr. Leonhard Oberascher.

easyCLEAN

Premium shade for generations.

TEXGARD

Perfect and durable protection of your awning cloth thanks to the Texgard Easy Clean finish. Every single fibre is carefully covered with a protective coating. Our proprietary impregnation prevents the permeation of the fibre by water, humidity and dirt, thus supporting the self-cleaning effect.

Sun-protection fabrics by Sattler offer:

- Outstanding dirt- and fungus-repellence
- High water repellence
- Very good rolling behaviour
- Excellent surface
- Brilliant and durable colours
